

GLACIERGRID

Official Press Kit

Term dates: October 2023 - Present

Championing Sustainability

At the intersection of technology and sustainability, GlacierGrid is revolutionizing the industry.

GlacierGrid is a significant player in business energy management, built on a foundation of Arete, Data, and Commitment principles. From monitoring, we have evolved to specialize in strategic energy optimization—focusing on HVAC systems.

Our solutions are carefully crafted to combine cost-effectiveness with sustainability, ensuring that businesses are able to grow in more ways than one.

Our platform integrates seamlessly with existing infrastructure to provide real-time energy insights and proactive cost forecasting. It also extends capabilities such as remote system control and critical alerts, both of which support our sustainable and informed management approach.

Leveraging technology, we are a trusted ally for businesses seeking sustainable solutions for robust asset protection and enhanced operational efficiency—underscoring our commitment to industry excellence and a sustainable future.

CONTACT INFORMATION

 +1 (877) 246-4401  info@glaciergrid.com

Manik Suri
Founder & CEO

Manik Suri is the Founder and CEO of GlacierGrid. Before founding GlacierGrid, Manik co-founded the Governance Lab (GovLab), an innovation center at NYU that developed technology solutions to improve government. He is a former Affiliate of Harvard's Berkman Center for Internet & Society and has held positions at global investment firm D.E. Shaw & Company and the White House National Economic Council.

Aaron Cohen
President

Aaron Cohen, co-founder and President of GlacierGrid, believes the food service industries will help lead the sustainability movement because it's the right thing to do and it makes exceptional business sense. A serial internet entrepreneur, he has steered four startups, generating nearly \$100 million for shareholders.

Chander Chawla
CPO

Chander Chawla is a technology executive who brings a unique perspective to creating new technology-based products. He has lived and worked in six countries in multiple sectors and roles within the hi-tech industry. Chander's highlights include inspiring teams to solve user problems by building 25+ new products based on disruptive technologies like WiFi, wearables, cryptocurrencies, and artificial intelligence; running a \$600M business to add \$150M in new earnings; and leading large global teams of 80+ people.

Gerald Zingraf
VP of Business Development

Gerald Zingraf serves as the VP of Business Development at GlacierGrid. With a robust background in solution engineering, sales enablement, and strategic partnerships, he is a seasoned entrepreneur driven by innovation. Gerald is passionate about sustainability and is dedicated to forging a brighter, more sustainable future for his children.

Lucas Tepman
CFO

Lucas Tepman is a social entrepreneur and an impact investor with operational experience in Latin America and the U.S. He was selected as a Fulbright Scholar in 2018 to complete his master's degree at UC Berkeley where he focused on the intersection of entrepreneurship, sustainability, and finance. Lucas brings experience working for management and public affairs consulting, NGOs, government, and impact investing. At GlacierGrid, Lucas is responsible for driving business strategy, product, and investor relations.

Liz Piontkowski
Management Ops Dir.

Liz Piontkowski is an operations leader with experience building ground-up teams and distilling cross-organization processes in the supply chain sector. In her previous roles, Liz worked with brands like Deposco, Chick-fil-a, and Panera. At GlacierGrid, she focuses on finance, HR, and sales operations and continuing to pursue our mission of reducing emissions through the cold chain.

PRODUCTS

LOGO VARIATIONS

GlacierGrid has three different logo variations for different purposes.

The primary logo is our default for most applications. The secondary should be used when the primary is not appropriate for the intended use. The brand mark can be used for applications where the full logo would not work (for example a favicon or app widget).

GlacierGrid Energy

GlacierGrid Energy integrates sustainability and tech to optimize HVAC and reduce energy and overheads with real-time analytics and predictive algorithms.

GlacierGrid offers businesses energy efficiency, proactive equipment alerts, and sustainability, all through precision engineering and eco-conscious innovation.

GlacierGrid Monitoring

Our refrigeration monitoring solution uses advanced sensor technology and data analytics to give businesses detailed insights into refrigeration cycles and temperature fluctuations. This helps ensure optimal performance and reduces energy waste.

GlacierGrid uses advanced machine learning to detect irregularities, ensuring timely interventions. We safeguard assets, prevent product loss, and provide peace of mind.

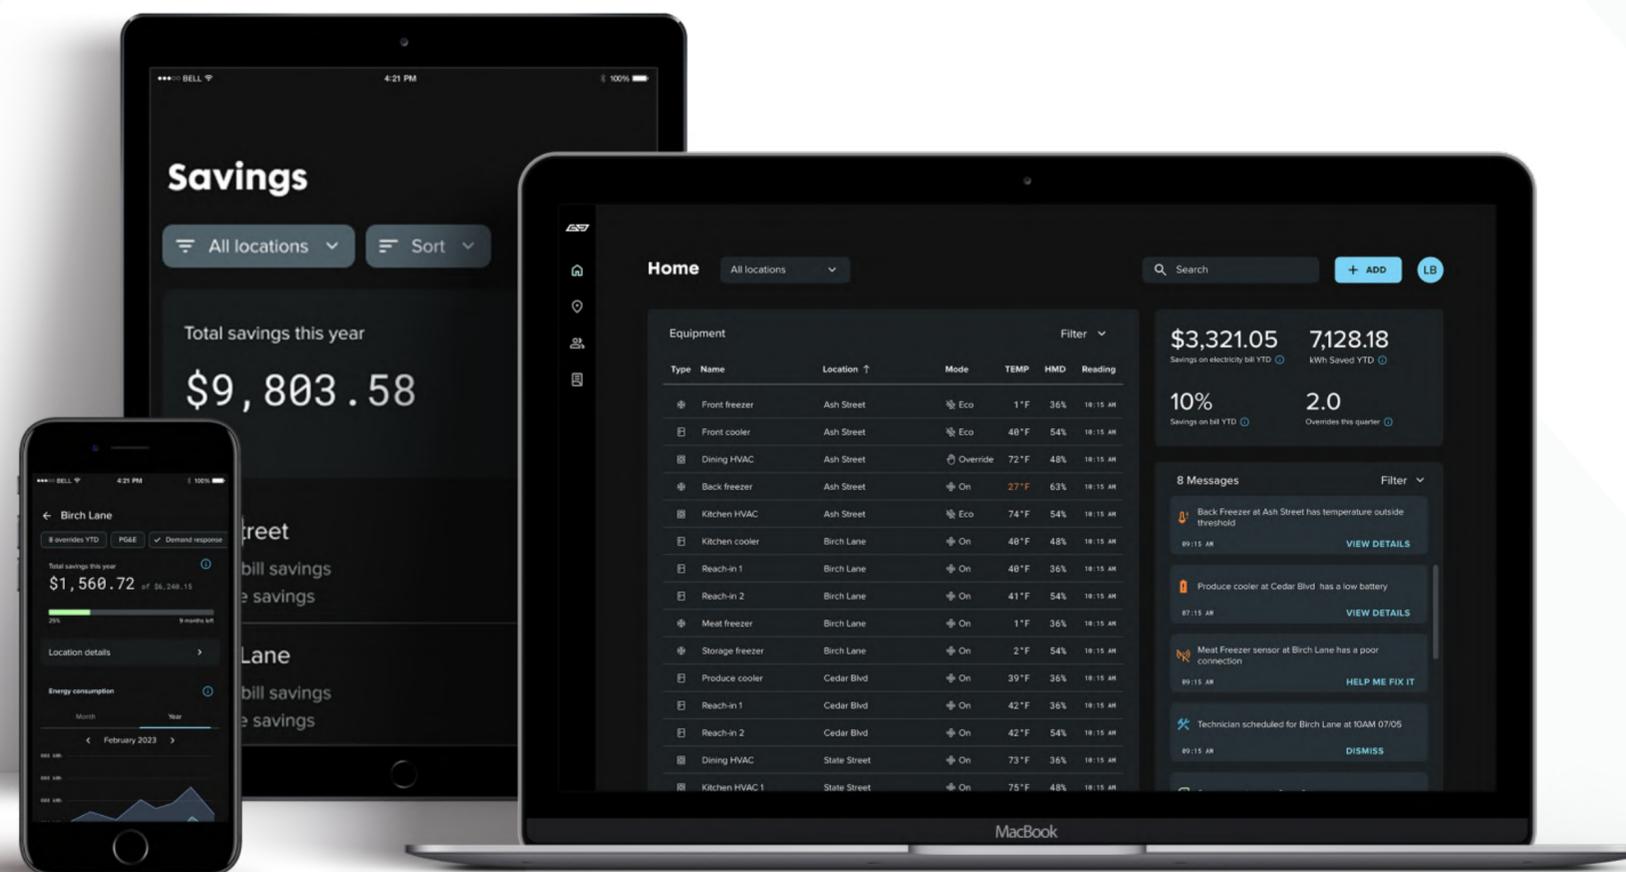

Desktop Dashboard App

GlacierGrid offers a user-friendly dashboard which can be accessed via a browser or mobile app. It combines the latest technology with a simple and intuitive interface to provide precisely processed data, including temperature and humidity—which helps streamline decision-making.

Upon logging in, users can immediately analyze the data, set alerts, invite team members, and schedule reports. What makes the GlacierGrid dashboard unique is its ability to create location-specific teams, ensuring that users only access the data relevant to their location.

GlacierGrid represents a promise of excellence in safeguarding assets, ensuring safety, and improving efficiency. Continuous asset protection helps businesses detect and address equipment problems early, reducing the risk of damage and downtime. The app also provides accurate data readings across multiple sites, making it a top energy and asset monitoring solution.

Additionally, it offers automated demand response, personalized energy-saving strategies, and reliable support to help businesses conserve energy while delivering an exceptional user experience.
