

GlacierGrid Case Study

Customer Overview

Luihn VantEdge Partners (LVE) is a premier franchisee of Yum! Brands, operating over 170 Taco Bell locations across multiple states. Established with a focus on operational excellence, LVE has built a reputation for its commitment to quality, customer satisfaction, and efficiency. With a substantial footprint in the quick-service restaurant industry, their emphasis on innovation and technology adoption aligns seamlessly with operational enhancements and cost-efficiency.

Working with GlacierGrid

GlacierGrid delivered substantial operational savings to Luihn VantEdge by automating essential processes. **Through automated monthly HVAC health audits, Luihn VantEdge saved \$150 per site, amounting to a total monthly saving of \$10,500 across their 70 equipped locations.**

Additionally, the capability for remote diagnosis eliminated unnecessary truck rolls saves \$120 monthly per site. **Furthermore, automated temperature monitoring significantly reduced manual labor, with monthly savings of \$13,250 across all 70 locations.**

These efficiencies highlight the direct impact from the following GlacierGrid benefits:

- Protects food inventory through real-time, customized temperature alerts.
- Promotes guest/employee comfort through real-time environment monitoring.
- Sheds light on potential equipment issues by flagging irregular temperature patterns.
- Eliminates the need for manual cooler/freezer checks.
